

## WAND Nuclear Decommissioning Taxonomy

Nuclear facilities provide the world with much needed power, research, production, and uranium mining. However, at some point these facilities need to be decommissioned. Nuclear decommissioning is both an administrative and a technical process. And on both sides, loads of information and data is created. But what happens to this information? Is it being effectively categorized, stored, and used or is it disappearing into the depths of your company's dark data? If the latter is true, then you need the Nuclear Decommissioning Taxonomy by WAND. With this product, you can organize your information with ease, train your AI with speed, and begin using your company's documents and data in no time. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **286** terms and **152** synonyms.

Top level terms include:

- Decommissioned Facility **(119)**
