WAND Medical Devices Taxonomy

As the medical field becomes more advanced, the devices and technologies they employ grow and increase in intricacy. The documents, information, and data generated from medical device manufacturers and the medical facilities that use them is insurmountable. With the life-saving importance of these devices, why would you let the documents, information, and data generated fall into the depths of dark data? WAND's Medical Devices Taxonomy provides the metadata model needed to organize your information with ease, train your AI with speed, and begin using your company's documents and data in no time. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **833** terms and **322** synonyms.

Top level terms include:

- Associations **(3)**
- Development Process **(178)**
