

WAND Medical Conditions Taxonomy

The WAND Medical Conditions Taxonomy is comprised of 1,327 terms and 421 synonyms. It covers medical conditions such as Cancer, Anemia, Disabilities, Disorders, Infectious Diseases, Musculoskeletal Diseases, Pregnancy, Respiratory Tract Diseases, Skin Diseases and more.

Organized into a simple and straightforward hierarchy, this taxonomy is ideal for a hospital or other medical business that wants to help make medical information easy to find for doctors, patients, and other stakeholders.

The WAND Medical Conditions Taxonomy and the WAND Specialties Taxonomy would be great starter taxonomies for a hospital website.
