

WAND Lumber Manufacturing and Forestry Management Taxonomy

Trees: some of the longest living organisms on earth which never die of old age. They are responsible for many aspects of human life. The Lumber Manufacturing and Forestry Management industries are responsible for both looking after the health and safety of our trees and utilizing the wonderful resource that is wood. It's only fair, then, if your organization can also responsibly handle their documents and data. The WAND Lumber Manufacturing and Forestry Management Taxonomy is designed for any company that engaged in timber extraction and replanting, as well as lumber manufacturing operations. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.
