

## WAND Health Insurance Taxonomy

The very first instances of insurance can be traced back to Babylonian and Chinese traders. Since then, insurance policies and companies have become more advanced and cover a large variety of topics. WAND's Health Insurance Taxonomy is a hierarchical set of terms and accompanying synonyms which cover all health insurance products and underwriting procedures. The WAND Health Insurance Taxonomy is well suited for any insurance company that provides Health Insurance options to their clients. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry. The WAND Health Insurance Taxonomy is the companion to the WAND Insurance Taxonomy.

This taxonomy contains 870 terms and 908 synonyms. Top-level terms include:

- Fraud
- Health Insurance Products
- Laws and Regulations
- Plan Documents and Forms
- Plan Terms and Provisions
- Underwriting
- Underwriting Metrics
