WAND Human Resources Taxonomy

This taxonomy provides a major jump start for any human resources department that needs to build a taxonomy to make its assets more findable. Perfect for internal HR department use and for a company who may be building an intranet and wants to make human resources information — like forms or benefits documents for example — more easily located for its employees. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **1,142** terms and **2,073** synonyms.

Top level terms include:
