WAND Research and Development Taxonomy

Research and development: the work directed toward the innovation, introduction, and improvement of products and processes. R&D is what allows your company to stay relevant and move into the next stage of business in an ever-changing world. But the process is no simple task: it takes time, energy, creativity, blood, sweat, and tears. And more importantly, all this innovation and implementation creates a lot of documents and data. To the point where you may feel like you are drowning in the sheer volume of it all. But there is a solution! The WAND Research and Development Taxonomy. This taxonomy can help you organize your documents with ease, train your AI with speed, and help you begin to use your company's R&D documents and data in no time! As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **861** terms and **893** synonyms.

Top level terms include:

- Deployment **(6)**
- Design **(94)**
- Development **(94)**
- Research **(208)**
- Research and Development **(4)**
- Study Reports **(68)**
- Testing **(381)**
