

## WAND Telecommunications Taxonomy

The WAND Telecommunications Taxonomy contains 1,791 categories and 1,021 synonyms covering all the areas that a Telecom Provider deals with daily.

The WAND Telecommunications Taxonomy was created specifically to provide a foundation set of terminology for any Internet, Cable, Phone or Cellular provider to tag and organize documents.

This taxonomy can quickly be customized by adding to the already extensive lists of protocols and infrastructure as well as to the services offered and the hardware provided.
