

WAND Railroad Taxonomy

Railroads are the most efficient transportation mode for moving goods on the earth's surface. Why should their documents and data be any less efficient? WAND's Railroad Taxonomy allows you to organize your documents with ease, train your AI with speed, and begin to use your company's documents and data in no time! With this taxonomy, you can turn your data into the most efficient system it can be. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **1,823** terms and **1,063** synonyms.

Top level terms include:

- Acts and Regulations **(23)**
