WAND Food and Beverage Manufacturing Taxonomy

From farm to table, the industry of food and beverage manufacturing has numerous steps and processes. Imagine, if you will, a library full of paper copies of all your company's documents and data. How big would it be? How many stories would be needed to fit all the information about food and beverage manufacturing from your company? Unfortunately, right now, there is no Dewey Decimal System for your data. Petabytes of data in the form of reports, whitepapers, forms, research, and a host of other formats are just loose in this library. How would you find the information you were looking for armed only with your brain and time? Sounds exhausting, or even impossible, right? Thankfully, you don't have to leave your library of information without an organization or classification system! WAND's Food and Beverage Manufacturing Taxonomy provides the metadata model needed to organize your information with ease, train your AI with speed, and begin using your documents and data in no time. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **2,632** terms and **638** synonyms.
