

WAND Wastewater Utilities Taxonomy

What's up with wastewater? Eight billion people end up creating a lot of wastewater — more than the ecosystem can naturally purify on their own. Wastewater treatment facilities provide a vital step which protects people and local ecosystems from the toxic elements found in wastewater. From measurements to treatment to infrastructure, wastewater organizations deal with a lot of data and documents daily. Without a clear organizational structure in place, this data can be lost, unusable, or ineffective. WAND's Wastewater Utilities Taxonomy addresses all these areas and more. You can organize your documents with ease, train your AI with speed, and begin using your company's wastewater utilities documents and data in no time! As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms related to your specific needs or industry.

This taxonomy contains 519 terms and 246 synonyms. Top level terms include:

- Associations and Organizations
- Design and Installation
- Forms
- Maintenance and Repairs
- Measurements
- Wastewater Collection Systems
- Wastewater Pollutants
- Wastewater Sources
- Wastewater Standards and Guidelines
- Wastewater Treatment
- Wastewater Types
- Wastewater Utilities Metrics
- Wastewater Utility Infrastructure

Wastewater Utilities (519 Terms)

Associations and Organizations	10
Design and Installation	67
Forms	8
Maintenance and Repairs	35
