

WAND Project Management Taxonomy

Managing a project can be a daunting task. From the beginning planning stages through to completion, this process is bound to generate numerous documents. The terms included in this taxonomy cover all the important documents that are created while managing a project. By tagging documents with this project management vocabulary as they are checked into a document management system, they can easily be found later. Customize this taxonomy with a set of a company's specific project names so multiple sets of project management documents can be tagged and easily be navigated by document type and project name.

This taxonomy contains 1,017 terms and 442 synonyms.

- Completion (13)
- Documents and Records (146)
- Execution and Construction (54)
- Initiation (31)
- Monitoring and Control (135)
- Planning and Design (360)
