

WAND Engineering Taxonomy

Engineering involves the use and application of scientific principles to design and build machines, structures, and many other things. With the level of creativity and precision needed for this profession, why would you waste your time on unorganized data systems? The answer is you shouldn't have to. WAND's Engineering Taxonomy can help! With this taxonomy, you can organize your information with ease, train your AI with speed, and begin using your documents and data efficiently in no time. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

Engineering (1,780 Terms)

Engineering Design Process	291
Engineering Documents	150
Engineering Drawings	251
Engineering Fields	179
Engineering Materials	825
Engineering Organizations	43
Professional Certifications and Licenses	15
Requirements and Standards	18

This taxonomy contains 1,780 terms and 749 synonyms. Top level terms include:

- Engineering Design Process
- Engineering Documents
- Engineering Drawings
- Engineering Fields
- Engineering Materials
- Engineering Organizations
- Professional Certifications and Licenses
- Requirements and Standards
