

WAND Fleet Management Taxonomy

Imagine, if you will, a library full of paper copies of all your company's documents and data. How big would it be? How many stories would be needed to fit all the information about fleet management from your company? Unfortunately, right now, there is no Dewey Decimal System for your data. Petabytes of data in the form of reports, whitepapers, forms, maps, and a host of other formats are just loose in this library. How would you find the information you were looking for armed only with your brain and time? Sounds exhausting, or even impossible, right? Thankfully, you don't have to leave your library of information without an organization or classification system! WAND's Fleet Management Taxonomy provides the metadata model needed to organize your information with ease, train your AI with speed, and begin using your documents and data in no time. As with all our taxonomies, this strong foundation

metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains 1,082 terms and 250 synonyms. Top level terms include:

- Compliance
- Fleet Documents
- Fleet Metrics
- Fleet Operations
- Fleet Policies and Procedures
- Organizations
- Regulatory Agencies
- Risk Management
- U.S. Department of Transportation Regulations
- Vehicle Technology Systems
- Vehicles and Heavy Equipment
