

WAND Property and Casualty Insurance Taxonomy

WAND's Property and Casualty Insurance Taxonomy is another portion of our Insurance Taxonomy series. It is designed and built to address both commercial lines and personal lines of property and casualty insurance. It also provides for underwriting and reporting/disclosure requirements in these areas. This is the perfect taxonomy for any insurance company that provides property, vehicle, or liability insurance options to their customers. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains 793 terms and 501 synonyms. Top level terms include:

- Binders
- Forms
- Fraud
- Insurance Claims
- Insurance Policies
- Products
- Reporting and Disclosure Requirements
- Underwriting

Property and Casualty Insurance (793 Terms)
